LINCOLN MACHINE

CNC Machining

***Specializing in Prototype, Short Run and Tool and Die
Custom machining requests are welcome.***

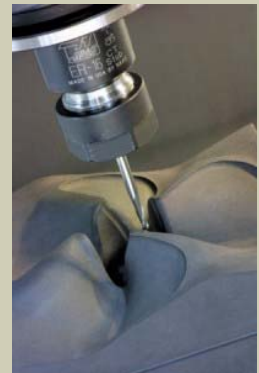

Offering precision machine shop services for complex or difficult to machine components that need very close tolerance machining. Lincoln Machine is ready to fulfill your CNC machining requirements.

With today's market demand on individual, flexible and just-in-time production needs, Lincoln Machine's CNC machining and networked design software provides customers with unparalleled quality and consistency throughout your parts manufacturing cycle.

Under one roof our CNC department includes:

- **One Makino A77 Horizontal Machining Center** 4-Axis with Pallets. Short lead times are due to this machines cutting speeds up to 10,000 rpm and traverse speeds up to 1,180 ipm. A 40-tool magazine and pallet changer greatly increase our productivity insuring on-time delivery.
- **Seven Vertical Machining Centers** This selection of machining centers represents an incredible versatility to accommodate and provide superb parts for our customers. We have the capacity to accommodate parts up to 84" long and 6,600 lbs in weight.
- **2, 5 and 8 Axis CNC Turning Centers** Machining complex or difficult parts in only one set-up provides our customers with incredible accuracy and reduced set-up times.

Machining Graphite

Our versatile variety of machining equipment benefits you the customer, as we are able to deliver finished machined parts from one supplier. This eliminates split responsibility for product quality, additional costs in shipping and decreasing the time it takes for you to receive your completed order.
